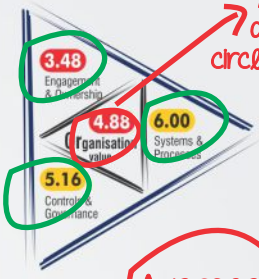
Organisation Value

This value dynamic is about **HOW** an entity does. Value in this dynamic is created/unlocked or value loss arrested when execution is strengthened through employee engagement & ownership; dynamic systems & processes, effective controls & governance.



Average of scores circled in green

Engagement & Ownership (3.48)

Average of

Statement	Score
Employees have the opportunity and are encouraged to articulate their needs and share their views & insights	4.50
Decisions are made through broad involvement of relevant people & through a process of genuine consensus	1.12
We continuously create shared understanding amongst our people and meaningfully energize them	4.82

When this is strong, it provides a reason and pull for people to get involved with the entity with greater amount of ownership. In its absence or weakness, the commitment of the team towards the entity's purpose and goals will be diluted or non-existent, reducing the overall effectiveness of this value.

Controls & Governance (5.16)

Statement	Score
We have a framework that ensures financial & decision making authority with clear accountability at all levels	1.10
We have mechanisms to monitor the consistent practice of our compliance, control & governance processes	7.20
We are statutorily compliant & well governed in all aspects of our business	7.20

When this is strong, it establishes the entity as having good & transparent governance mechanisms that enhances its reputation as a corporate citizen. Strength in this also makes financial decision making easier across the entity. Absence or weakness of this is likely to reduce involvement of people and effectiveness of the enterprise value as a lot of time could get wasted in determing whether what the entity has done is indeed correct. On the flip side excessive controls that are not principle based or enabling can make the entity bureaucratic or stifling for its people.

Systems & Processes (6.00)

Statement	Score
We have standardized systems & processes for all our operations and they are practiced consistently	7.00
We have mechanisms to review & measure the effectiveness of our systems and processes	4.00
Our systems and processes deliver efficiency & cost effectiveness	7.00

When this is strong, it ensures cost competitiveness of the entity through high levels of efficiency. Not having this results in a lost opportunity for growth through reduced profitability.

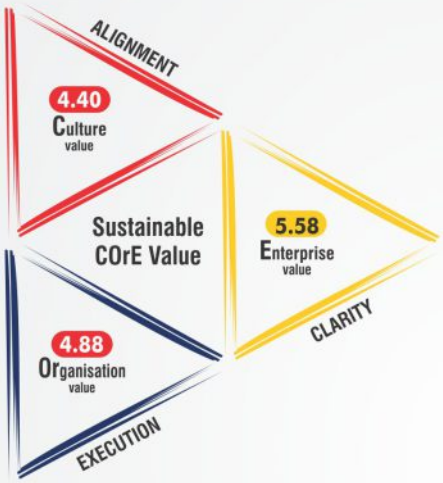
The scoring is same for all the tables on pg 4, 5 and 6

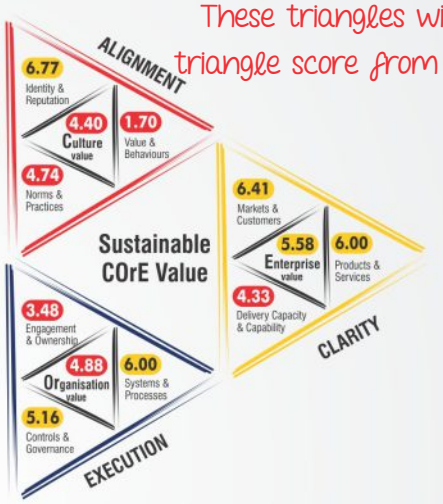
Value Dynamics: Results & Insights

Presented below are the scores for each Value Dynamic based on the responses of all the respondents. This gives a picture of the response group's perspective of the entity across the 3 Value Dynamics & its sub-dynamics.

- The Bright Spots are shaded in green and have a score of 8 & above
- The Hot Spots are shaded in red and have a score of less than 5
- The dynamics and the sub dynamics with a score between 5 to 7.99 are shaded in Amber.

These triangles will reflect the triangle score from pg no. 4, 5 and 6





The detailed results for each dynamic and sub-dynamic are presented below. It is recommended that you discuss the diagnostic results in your core/response group to validate this perspective and determine the way forward.

Outlined below are some questions to aid you and your core/response group to reflect on the results to determine the appropriate way forward. Do note that each sub-dynamic and dynamic will have different solutions.

Hot Spots		Bright Spots
• How do you feel about this being a hot spot? • What is causing this to be a hot spot? • What actions would you like to take to make it a bright spot?	• How do you feel about this not being a Bright spot? • What is it, if we don't pay attention to, will become a hot spot? • What actions would you like to take to make it a bright spot?	• How do you feel about this being a bright spot? • How has this become a bright spot? • What actions need to be taken to maintain or leverage it further?
